FITTINGS & ACCESSORIES

Once you have selected Panel type and colour, it is time to think about fittings and accessories. Shown above are the range of fittings and accessories to give your cladding installation a clean finish.

ASSEMBLY & INSTALLATION GUIDELINES

- Fix aluminium wall brackets on the exterior of the base concrete wall, using stainless steel anchor bolts.
- Vertical aluminium runners should be fixed to the aluminium wall brackets using stainless steel through bolts.
- ALUPEX FR / A2 fabricated tray panels should be supported on vertical aluminium runners using aluminium cleats.

- Extruded Aluminium U channels and silicone sealants are ideal to fill horizontal and vertical gaps between adjacent panels.
- Fixing of mineral fibre insulation at varies thickness/density and fire cavity barriers at appropriate places should be as per local Civil Defence code of practice.
